INVITE TO SEE STEM EDUCATORS ACADEMY IN ACTION Where Summer Collaboration Sparks Student Excitement

What do you get when you combine classroom teachers, community educators and cultural institutions? Innovation, enthusiasm and engaging lessons that will spark young scientists.

The STEM Educators Academy is an initiative of TASC (The After-School Corporation) that unites science teachers and after-school educators in learning maker design projects. Teachers and educators join together at the Intrepid Sea, Air and Space Museum, New York Hall of Science or the Institute of Play for several days of collaborative professional development. They then meet back at their schools to plan and team-teach the projects they learned.

And the students? They get hands-on experiences that spark interest in STEM subjects. Whether partnering with their peers to tackle design challenges, collecting data or conducting experiments, kids are transformed into explorers and the learning is brought to life.

You can see the STEM Educators Academy in action this summer, and then follow up with a school visit in the fall. Educators and Teachers will be working together on the following dates:

NY Hall of Science (NYSCI)

8/25 or 8/26
(47-01 111th St, Corona, NY)

Intrepid Sea, Air and Space Museum

8/18 or 8/19
(Pier 86 – W. 46th St and 12th Ave, Manhattan)
